Note: Standard shelf life is amended to six months from date of purchase when stored at 70°F and 50% RH. It is highly recommended that this product be converted and applied to substrate within six months of purchase. Dissolvable Paper with S2600 adhesive is extremely sensitive to ambient relative humidity and temperature. Exposure to environmental conditions other than those recommended will accelerate facestock shrinkage or liner growth. Material should remain in polyethylene wrap when stored. Users should monitor absolute humidity in converting location.

**Shelf life:**
Unless specified otherwise in this document, one year when stored at 72°F at 50% RH.

**Statement of Practical Use:**
All pressure-sensitive materials should be tested thoroughly under end-use conditions to ensure they meet the requirements of the specific application.
